

Title

Payment does not make fields mandatory (name, expiration, cvc)

Priority

Medium

I am making an assumption in this exercise that a third party payment system would verify these fields when handling a transaction and that this example would fail to be processed so a client is not charged.

Looks like a straightforward correction that someone can pick up when free.

I would still fix this issue before making a release, just prioritise other issues first.

Description

Paying for membership without missing name, expiration and cvc
(card number is mandatory and displays an error when missing)

Payment is successful but it should fail because these are required to make a payment

Payment

You're paying your membership fee for **Polisportiva Lago di Como**.
